

Second Workshop on

Model-Driven Software Development Today

October 15th-17th 2008
Nordakademie, Elmshorn
<http://mdsd08.techjava.de/>

Call for Papers

Goals

The main goal of the workshop is the establishment of interconnections between professionals in the area of model-driven software development. The collaboration in the MDSO community aims at increasing knowledge exchange between research and industry. The future growth in the area depends on the results of individual community members. Therefore the exchange within the community and discovery of research trends is an important goal of this workshop.

Contributions

Contributions to the following subjects

- Concepts, methods, approaches in MDSO
- New areas of applications of MDSO
- Tool and framework extensions (OAW, EMF, GMF, etc...)
- Practical experience reports

can be submitted online under the URL <http://conftool.techjava.de> until October 15-th, 2008. Research papers should be five to eight pages long and follow the LNI guidelines; for industrial reports a one to two page summary is sufficient. Accepted contributions will be published in the workshop proceedings. Authors will be granted access for the Management day and for the first Professional Day. Further details and templates for authors are available at <http://mdsd08.techjava.de/submission.php>.

Program committee

Prof. Dr. Johannes Brauer, Nordakademie
Oliver Ihns, Holisticon AG
Dr. Jan Köhnlein, itemis AG

Prof. Dr. Friedrich H. Vogt, TUHH
Simon Zambrovski (chair), TUHH

Peter Friese, itemis AG
Bernd Kolb, kolbw@re
Markus Völter, voelter - ingenieurbüro für software-
technologie

Prof. Dr. Volker Turau, TUHH
Prof. Dr. Frank Zimmermann, Nordakademie
